PROFESSIONAL SUMMARY

Full Stack Developer and BCA student with hands-on experience building and deploying MERN-stack applications using React.js, Next.js, Node.js, Express.js, MongoDB, REST APIs, Socket.io, and JWT authentication. Improved MongoDB query response time by 90% through compound indexing and cursor-based pagination. Building with TypeScript and writing automated test cases in an ongoing project. Seeking a Full Stack Developer internship or entry-level role.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Responsive Design
Backend: Node.js, Express.js, RESTful APIs, API Integration, Socket.io, WebRTC, Middleware, Error Handling
Database & Security: MongoDB, Mongoose, Database Design, CRUD, Indexing, Pagination, JWT, Passport.js, HTTP-only Cookies, bcrypt, CORS, Helmet, Zod, Joi
Testing & Tools: Automated Testing, Test Case Design, Git, GitHub, Postman, Cloudinary, Vercel, Render, EJS, MVC Architecture

SELECTED PROJECTS

Connect Pros — Professional Networking Platform

Tech: Next.js, React, Redux Toolkit, Node.js, Express.js, MongoDB, Socket.io, JWT, Cloudinary
Links: Live Demo | Frontend Code | Backend Code
Completed: October 27, 2026

- Improved MongoDB query response time from 500 ms to 50 ms (90%) using compound indexes and cursor-based pagination for messages and user search.
- Built real-time one-to-one chat with Socket.io, read receipts, online presence, and idempotent message delivery.
- Implemented JWT authentication in HTTP-only cookies, bcrypt hashing, email OTP flows, request validation, rate limiting, and Cloudinary media uploads.
- Delivered professional-networking features including connections, posts, likes, comments, live notifications, and PDF profile export.

Sahil Zoom — Real-Time Video Conferencing App

Tech: React.js, Node.js, Express.js, MongoDB, Socket.io, WebRTC, Material UI
Links: Live Demo | Frontend Code | Backend Code
Completed: May–June 2026

- Developed multi-participant audio and video calls using WebRTC with Socket.io signaling for offer, answer, and ICE candidate exchange.
- Built screen sharing, meeting controls, late-join message replay, live chat, and real-time participant state updates.
- Added secure user registration and login, meeting-history storage, and an Express.js backend for room management.

Wonderlust — Rental Listing Platform

Tech: Node.js, Express.js, MongoDB, EJS, Passport.js, Bootstrap, Cloudinary
Links: Live Demo | Code
Completed: March 10, 2026

- Built a full-stack rental platform with CRUD listings, image uploads, reviews, RESTful routing, and MVC architecture.
- Implemented Passport.js authentication, MongoDB-backed sessions, and authorization middleware for listing and review ownership.
- Added Joi server-side validation, centralized error handling, flash feedback, and cascade deletion for reviews.

CURRENT DEVELOPMENT

SKGit — Version Control System | In Progress

Focus: TypeScript, Automated Testing, Test Case Design
Links: Frontend Code | Backend Code

- Actively developing a version control system with TypeScript and writing automated test cases to improve code reliability and maintainability.

EDUCATION

Bachelor of Computer Applications (BCA) | 2024–2027 (Pursuing)
Class XII, UP Board, 2023 | **Class X**, UP Board, 2021
